Front-End Developer with proven experience at Scorpion automotive ltd and Marsh Finance in helping companies create and maintain a better code base for reusability. I am passionate about learning and development with a desire to apply skills to a larger development team. I am eager to tackle more complex problems and continue to find ways to maximise user efficiency.

Currently Studying a Front-End developer Course with EDX to become proficient in React, Node.js, jQuery, Api integration and much more. (Set to graduate on March the 22nd 2024)

Education

Computing (BSC) Computer Science University of Bolton 2015 - 2018

The Front-End Web Development Skills Bootcamp is structured into two main phases: Front-End Foundations and Front-End Frameworks, each consisting of weekly modules and culminating in group projects.

In the Front-End Foundations phase (Modules 1–8), participants establish a strong grasp of fundamental web development concepts such as HTML, CSS, and JavaScript. They also delve into topics like user experience design, Bootstrap, and working with APIs.

Transitioning to Project 1 (Modules 9–10), attendees apply their newfound skills to construct a client-side application, integrating third-party APIs to create dynamic functionalities.

Moving into the Front-End Frameworks section (Modules 11–14), learners advance their knowledge by exploring front-end libraries, testing frameworks, and advanced concepts like ES6 and React. Project 2 (Modules 15–16) serves as the culmination of the bootcamp, where participants leverage their expertise to develop and deploy a sophisticated client-side single-page application.

Throughout the bootcamp, participants not only acquire technical skills but also hone essential soft skills such as team collaboration, agile development methodologies, and effective project demonstration and storytelling. By the end of the program, they emerge equipped to create professional project portfolios and tackle complex challenges with creativity and pragmatism.

Experience

Junior Full Stack Developer

Marsh Finance LTD | August 2022 - December 2023

Rochdale, Greater Manchester.

Marsh finance is a Vehicle Finance company out of Rochdale, Greater manchester.

As a Junior Full Stack Engineer at Marsh Finances, I contribute to the development of our in-house system for processing finance applications. My role involves collaborating with third-party funders, brokers, and dealers to facilitate finance agreements and oversee the entire customer journey, ensuring a seamless experience.

One significant accomplishment is the creation of a comprehensive portal tailored for funders, brokers, and dealers. This portal enables them to efficiently generate finance agreements, monitor existing agreements, track user data, vehicle information, and more.

Additionally, I was tasked with developing the customer portal. This platform enables customers to check the status of their finance agreements, review their finance amounts, view financed vehicles, and access other relevant information.

- Contributed to the design, architecture, and build of a brand-new part of the Marsh FinTech platform
- Worked closely with stakeholders in other areas of the business to gain a real understanding of what our B2B2C customers wanted
- Helped promote coding standards and championed best practices, including **OOP, TDD, BDD, CI/CD**.
- Worked to ensure that our customers and colleagues had all the information and tools they needed to be successful
- Utilised my knowledge of **PHP frameworks** and JS frameworks (**Vue.js, Typescript**) in my tasks alongside **HTML and CSS**
- Leveraged my knowledge of dependency management tools (**Composer, npm**) to enhance project development
- Managed tasks using Jira ticketing system and version control systems e.g. **GitHub**
- Implement **REST APIs** and develop with **PHP 7+, JavaScript, Typescript, and MySQL**

Junior Software Engineer

Scorpion Automotive Ltd | March 2021 - August 2022
Chorley, Lancashire.

Scorpion Automotive is a Vehicle Tracking Company out of Chorley, Lancashire.

As a junior software engineer primarily focused on front-end development at Scorpion Automotive Ltd, I was deeply involved in enhancing their in-house system designed for managing customer vehicle tracking information. This system enabled customers to access various data points such as stolen vehicle tracking details, GPS tracking updates every 5 seconds, ghost mode functionality, and vehicle transfer capabilities, among others.

Among the projects I undertook, one notable task involved implementing a MOT and tax feature. This feature allowed customers to easily track the expiration status of their MOT and tax, receiving timely notifications accordingly. Leveraging APIs from DVLA and DVSA, I integrated the system to retrieve relevant information and update vehicle registrations within the Scorpion database, Using Python for this purpose.

Furthermore, I contributed to improving the company's backend system by addressing bugs and introducing new functionalities like lifetime subscriptions and facilitating seamless vehicle transfers between individuals, among other tasks.

- Assisting the senior engineers with all aspects of development
- Learning the codebase and improving your own programming skills
- Writing and maintaining code written in **PHP, JS and Vue, HTML and CSS**
- Interfacing the backend software with **MySQL** databases
- Working on various bug fixes
- Responding to requests from the development and admin teams
- Creating reports using **SQL**
- Creating and managing tasks in Jira
- Pair programming with senior engineers
- Work with in house design team to create web pages from PSD files
- Writing and maintaining code written in **Python using XSLWriter, Pandas**, and much more

Junior ServiceNow Developer

Itoms Solutions LTD | July 2020 - January 2021

Remote

- Guided a new ServiceNow ITSM Developer and delivered requirements
- Developed an understanding of the HR module and assisted in ServiceNow implementation
- Part of the ServiceNow DevOps team working within the Home Office.
- Programmed in JavaScript and improved ServiceNow knowledge.
- insights into Mozaic's business, structure, culture, clients, and technologies
- focused on technology, undertook ServiceNow training, and acquired skills in project management, agile development practices, **ITIL foundation, and consulting**
- studied for and passed at least two formal exam certifications within a given period as part of my professional qualifications

Graduate ServiceNow Developer

Home Office | October 2018 - December 2019

Salford, Manchester

- Guided a new ServiceNow ITSM Developer and delivered requirements
- Developed an understanding of the HR module and assisted in ServiceNow implementation
- Part of the ServiceNow DevOps team working within the Home Office.
- Programmed in JavaScript and improved ServiceNow knowledge.
- insights into Mozaic's business, structure, culture, clients, and technologies
- focused on technology, undertook ServiceNow training, and acquired skills in project management, agile development practices, **ITIL foundation, and consulting**
- studied for and passed at least two formal exam certifications within a given period as part of my professional qualifications

Customer Service Manager Capita

August 2017- January 2018 | Bury, Greater Manchester

- Responding to customer complaints
- Escalating problems to the technical team or other members of the product team
- Updating customer information in the company database
